WHAT IS TOPS ON BLOOR?

TOPS, or Talented Offering in the Programmes of the Sciences is an enriched High School experience pioneered by the staff of Marc Garneau Collegiate Institute and available to qualified students at both Marc Garneau C.I. and Bloor C.I. Students need not be recognized as “gifted” to enrol. TOPS students are highly motivated and have a broad range of interests. Students in the programme are grouped together for most of their classes over the four years of secondary education and benefit from being surrounded by individuals with interests and goals similar to their own. Course work is enriched in a variety of ways depending on the strengths and interests of students and teachers.

TOPS is a four year program. Twenty courses are required.

Grade 9	Science Mathematics English Geography Computer Science
Grade 10	Science 2 Mathematics Careers & Civics English History
Grade 11	Biology, Chemistry and/or Physics Technological Design or Computer Science Mathematics (1 or 2)
Grade 12	Biology, Chemistry and/or Physics English Mathematics/ MAT157 at the University of Toronto

The Ontario Secondary School Graduation Diploma specifies additional required courses. Together these requirements limit the opportunities for some students to explore electives. However, students may choose to spread their courses over five years to accommodate interests in the arts, languages, humanities and cooperative education.
